-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

***Information Disclosure Statement***

The information disclosure statement filed 08 July 2003 fails to comply with the provisions of 37 CFR 1.97, 1.98 and MPEP § 609. It has been placed in the application file, but the information referred to therein has not necessarily been considered as to the merits. Applicant is advised that the date of any re-submission of any item of information contained in this information disclosure statement or the submission of any missing element(s) will be the date of submission for purposes of determining compliance with the requirements based on the time of filing the statement, including all certification requirements for statements under 37 CFR 1.97(e). See MPEP § 609 ¶ C(1).

***Specification***

The disclosure is objected to because of the following informalities: the status of the priority documents requires updating. Appropriate correction is required.

***Claim Objections***

Claims 4, 7 and 9 are objected to because of the following informalities: some words were missing the letter "e" presumably caused by technical problems; specifically, "delivery" in claim 4, line 2; "channel" in claim 7, 3ed to last line and; "fastener" claim 9, lines 6 and 10. Appropriate correction is required.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3, 4 and 7-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Jansen (US 2,550,357). Jansen discloses a sealable fastener, the sealable fastener in a structure and, method of securing the sealable fastener. In the embodiment of Fig. 7, Jansen discloses a sealable fastener comprising a shank (30) extending between a head (31) and an opposite end (not labeled) including a circumferential channel (32) in its side wall at the end adjacent the head and having threads (not labeled) between the channel and opposite end. There is provided a sealant delivery passageway (33) extending from a radial notch in the head (at 34) to the channel wherein in operation, the fastener is located in a receiving structure (S) and subsequently a flowable sealant is driven (at 19) through the notch and passageway and around the channel to provide a sealing contact between the sealable fastener and its receiving structure.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

---

Claims 2, 5 and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jansen as applied to claim 1 above, and further in view of Winston (US 4,945,625). Jansen does not disclose the fastener sidewall provided with a second channel. Winston discloses a sealable fastener having a second circumferential channel (see Figs. 7 and 9) for receiving a flowable sealant. At the time the invention was made, it would have been obvious for one of ordinary skill in the art to provide the fastener of Jansen with a second channel as disclosed in Winston in order to provide improved improvised sealing. Indeed a second channel would allow for additional sealant to make a better seal.

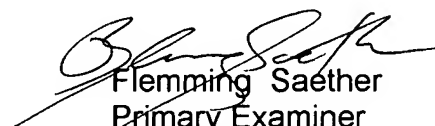

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Flemming Saether whose telephone number is 703-308-0182. The examiner can normally be reached on Monday through Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Judy Swann can be reached on 703-306-4115. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
